

FEBRUARY IS NATIONAL CHILDREN'S DENTAL HEALTH MONTH

DENTAL MATH

Solve the fun math word problems!

1. Calvin brushes his teeth three times a day with fluoride toothpaste. If he brushes seven days in a row, how many times will Calvin brush his teeth?

2. Teagan lost two teeth at age six, three teeth at age seven, three teeth at age eight, and four teeth at age nine. How many teeth has Teagan lost?

3. Dad bought four packs of dental floss. Each pack holds six yards of dental floss. One yard equals three feet. How many feet of dental floss did dad buy?

4. Willa, Holden, Violet, and Henry each go to the dentist two times a year. How many visits to the dentist does that make?

5. Milk is good for your teeth. Emma drinks four glasses of milk each day. How many glasses of milk does Emma drink in seven days?
