FEBRUARY IS

NATIONAL CHILDREN'S DENTAL HEALTH MONTH

FIDKIDS.COM

WEEK FOUR

FIND THE TOOTH FAIRIES HIDING AROUND THE FIRST IMPRESSIONS OFFICE!

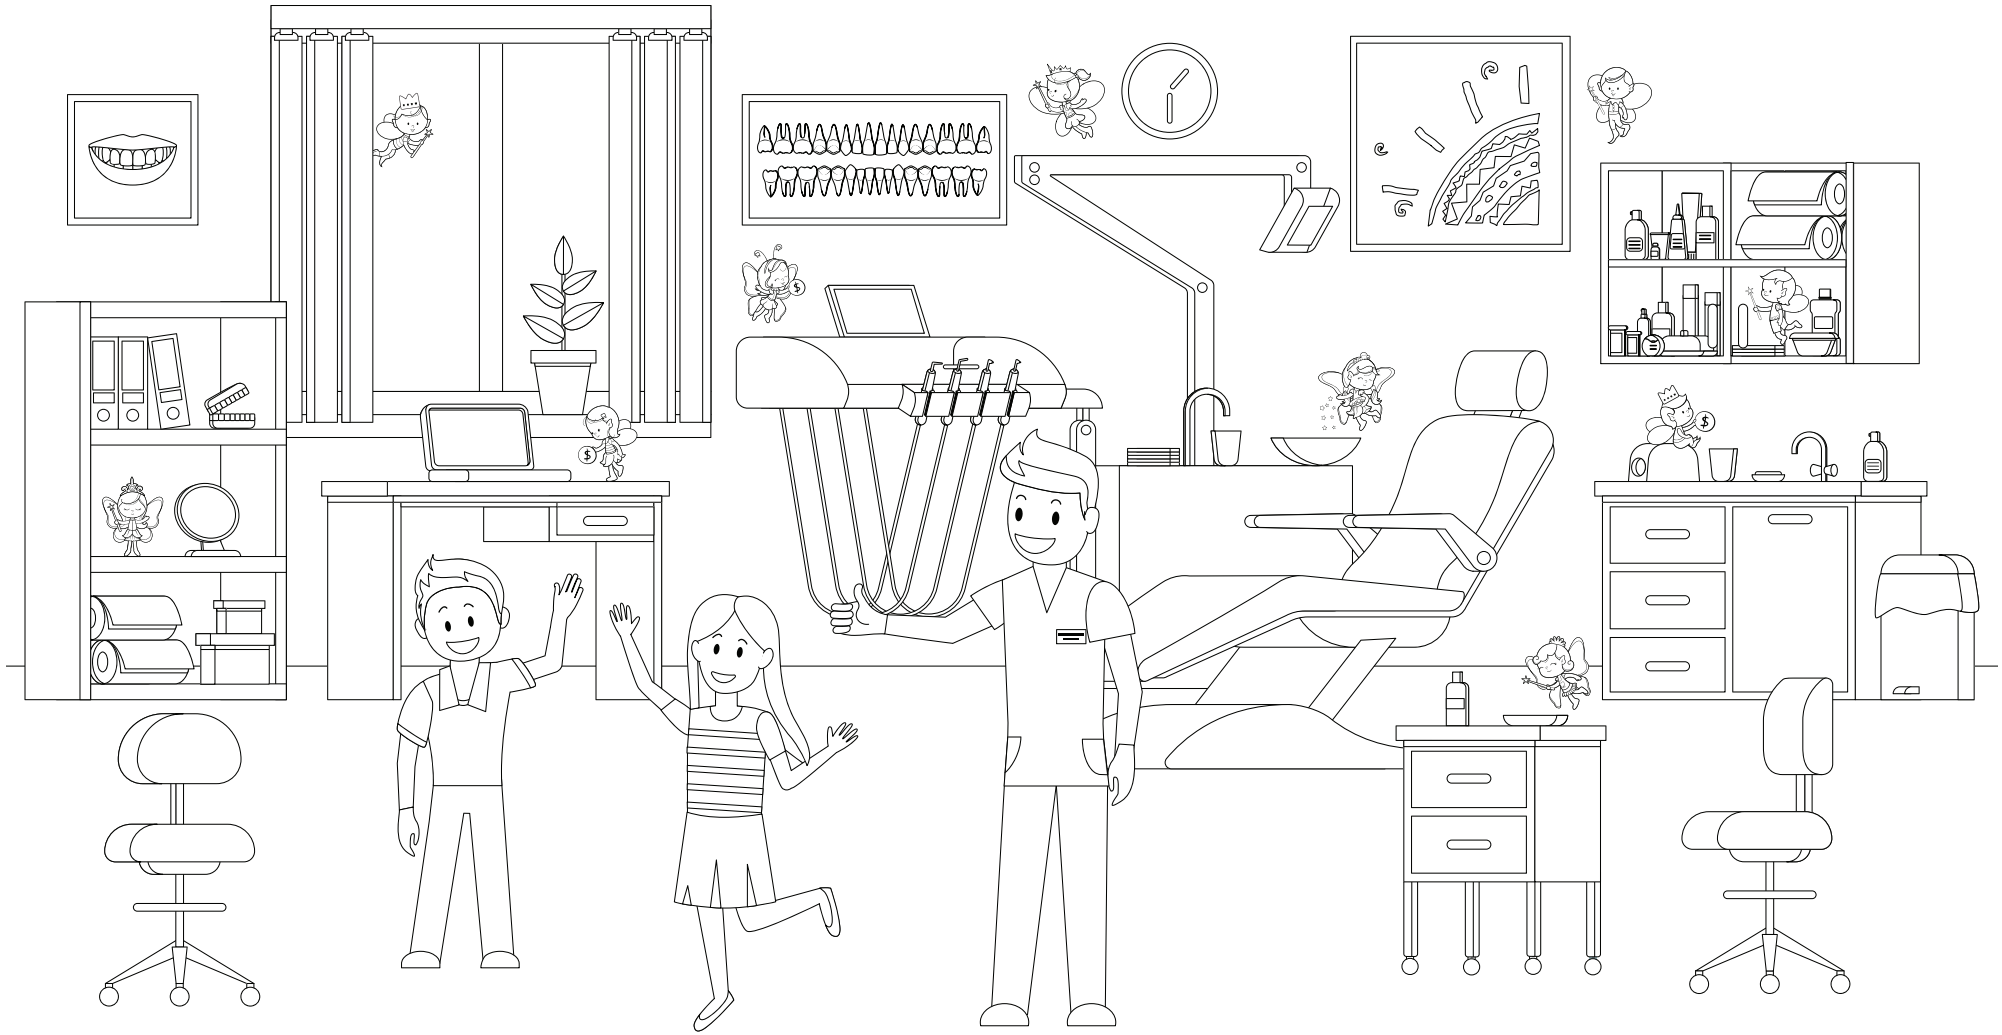
HOW CAN WE PROTECT OUR TEETH?

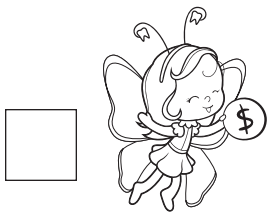
Dentists are doctors for your teeth. Visiting the dentist every six months is needed for protecting teeth from sugar bugs. Dentists clean your teeth and take pictures of your teeth to see if there are any holes in your teeth or if the armor on your teeth is getting weaker. Dentists are able to help get rid of tooth pain and sugar bugs so you can focus on having fun.

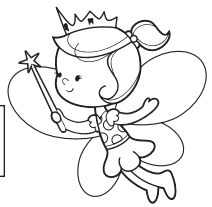
A pediatric dentist is a dentist who works with kids. These dentists have extra years of special training and schooling. A pediatric dentist helps teach you how to brush your teeth and gives you information on how to keep the sugar bugs away. A general dentist is someone who works with adults and kids.

MATERIALS NEEDED:

- Markers, colored pencils, or crayons

INSTRUCTIONS:






1. Find all 10 hidden tooth fairies around the First Impressions dental office.
2. Once you have found all 10 fairies, you can color the page.
